

ISOMS Program Committee and Needs Assessments

The Illinois Society of Oral and Maxillofacial Surgeons provides program evaluations and questionnaires following each educational program. Members who attend are required to complete the surveys and return them at the end of the program, when they sign out. The questionnaires are reviewed by the Program Committee chair and discussed with the Executive Council. On each form, there is a space where members may suggest program topics and speakers for future programming. They are also encouraged to contact the Program Committee chair or any member of the Executive Council during each membership meeting with their suggestions for future program topics, speakers and meeting locations.
